

ScanCAD moves to the mountains of Colorado

The new year 2018 marked a new start for ScanCAD! It was a time to pack and move the office to Conifer, Colorado — an altitude of 8,210 feet/2,523 meters!

The big move did not stop us by any means of the word:

- We continued to support our customer base in the 48 nations we now serve;
 - We released our new imaging platform along with our revolutionary software enhancements;
- We announced our new, enhanced calibration grids and scanner accuracy improvements.

For any more information about the new offerings mentioned above, please feel free to check the 'January 2018 A Quantum Leap Forward' newsletter on the main page of our website. Or contact us!

Of course, we still have our satellite offices in Michigan, Florida and Italy. Our Colorado Headquarters moved to a new location.

We love the new space and we hope you get a chance to visit us — whether for a meeting, training or just passing by! In the meantime, take a tour through our photos, below.
